

# preventative measures to keep you healthy on board

## Princess® puts your health and safety first

In addition to our existing rigorous daily cleaning regimen and standards, we are establishing extra sanitization measures on board all Princess ships. Here are some areas around the ship where you can expect to see changes:

1 Hand sanitizer when boarding or re-boarding the ship

1 Enhanced health screenings before boarding

2 Additional crew training on COVID-19 prevention and response

2 More protective gear on board

3 Enhanced stateroom cleaning

3 Higher laundry temperatures

3 Daily health broadcasts

4 Increased sanitization of outdoor areas

5 Reduced self-serve buffets

6 Increased sanitization of all restaurants and bars

Touch-free entrances & exits

Increased restroom sanitization

More hand sanitizer stations

Enhanced sanitization of high-touch surfaces

Note: Many of these measures will apply throughout the ship

1

Hand sanitizer when boarding or re-boarding the ship
